Event Funding Request
For Graduate Student Union Funds

Description:

The Graduate Student Union sets aside part of its budget to help provide funding reimbursements for events that are planned by other graduate student organizations throughout the academic year. While the Graduate Student Union does operate a social committee that plans various events for graduate students on campus and in the surrounding community, this funding program allows other groups to offer diverse experiences that may not be offered otherwise. Applications submitted to the Graduate Student Union for funding will be reviewed by the elected executive committee which includes the Graduate Student Union President and Co-Vice Presidents.

Guidelines:

The most important factor that will determine if funding is approved or denied is the versatility of the event proposed. The Graduate Student Union is responsible to all graduate students in the graduate school and thus, any funding provided for outside events must cater to the larger student body. Further, the event must be open to ALL graduate students and must be of likely interest to a diverse body of graduate students. For example, an event that caters to a small minority of students such as a department social or graduation party would not be eligible for funding. It is VERY important that funding requests comment on the versatility and likely appeal to the larger graduate student body.

Funding Stipulations:

By applying for and receiving funding reimbursements, organizations must comply with the Graduate Student Unions funding stipulations described below:

- Organizations must apply for funding before an event. The Graduate Student Union will not retroactively fund an event.
- All marketing of the event must acknowledge the Graduate Student Union as a co-sponsor of the event. This can be accomplished by including the “GSU” logo on all flyers and other advertisements.
- Events may not be held off-campus.
